## Load Shedding of Electricity on the Campus

Following an excessive heat being experienced in recent times as a result of the change in weather, it has resulted in a constant tripping of the automated solar plant due to overload of appliances. Consequently, members of the University Community are hereby informed that there would be load shedding in the supply of electricity especially in the New Campus.

Thus, there would be rotation in the supply of electricity between academic area and the staff quarters henceforth.

During the day time, electricity will only be supplied to the academic area while staff quarters and students hostel will be provided with electricity at night.

We appeal to members of staff to kindly bear with the situation as it is temporary.

Inconveniences regretted, please.
